- Familiar with C++, Operating Systems, Database Management Systems (worked with DBeaver, MongoDB & MySQL)
- Well-versed in Node.js frameworks like Express.js and middleware modules such as body-parser.

EDUCATION

Satyug Darshan Institute of Engineering & Technology,
Bachelor of Technology (B.Tech) in Computer Science

July 2022
Overall GPA: 7.4

Shanti Niketan Public School, Faridabad (CBSE Board),
Senior Secondary (12th Grade) in Science

May 2018
Overall Percentage: 72%

EXPERIENCE

VVnT SeQuor, Noida

Web Automation Engineer Trainee

Jan, 2022 - Jun, 2022

- Developed and implemented automated testing scripts using tools such as Selenium and Cypress to ensure the functionality and reliability of web applications.
- Assisted in maintaining and updating existing automation frameworks, ensuring compatibility with new software updates and features.

Loyalty Partner IT Solutions Pvt. Ltd.

Web Developer

Dec, 2023 - Present

- Created custom web applications with Angular and JavaScript.
- Built Node.js APIs and integrated front-end with back-end for smooth functionality.

PROJECTS

Personal Portfolio Website (javedportfolio.vercel.app)

Technology: Next.js, React, HTML, CSS, Tailwind CSS

- **Portfolio Website:** Built a high-performance portfolio with Next.js and React, using Tailwind CSS for a mobile-first design. Deployed on Netlify for fast load times, seamless updates, and optimal performance.

Benson Polymers – Loyalty Program Project

- **Coupon Generating API:** Developed a module for generating coupons, automating the creation and distribution of unique offers to users.
- **Coupon Scanning API:** Implemented an API to scan and validate coupons via the app, enabling seamless redemption.
- **Redeem Request & Approval:** Built functionality to send redemption requests through the app, with acceptance and approval via the web panel.
- **Dashboard Setup:** Configured a comprehensive dashboard for managing the loyalty program, tracking coupon redemptions, and user activities.

Marmo Tiles & Solutions – Sales Force Automation Project

- **Order Module:** Developed a comprehensive API for managing the complete order process, integrating variable pricing, discounts, and offers across both the app and web panel.
- **PDF Generation:** Utilized Chromium and EJS to enable PDF downloads of completed orders via the app, enhancing user accessibility and documentation efficiency.

Simoll Bath Innovation – Sales Force Automation Project

- **Quotation Module:** Built a precise pricing system with PDF generation, enhancing accuracy and streamlining documentation.
- **Dealers Module:** Developed a platform for seamless dealer management, enhancing engagement and operational efficiency.
- **Task Module:** Improved task completion and minimized delays through efficient tracking and management.

Technical SKILLS

- **Computer Languages:** HTML5, CSS3, JavaScript, Nodejs, Expressjs Nextjs, MongoDB, MySQL, C++.
- **Software and Tools:** VS Code, Apache, DBeaver, Putty, FileZilla, MySQL, Postman.

CERTIFICATIONS

- Programming in JAVA(NPTEL)
